### **Other Uses of Medical Information**

Other uses and disclosures of medical information not covered by this Notice or by other laws that apply to us will be made only with your written permission. The following is a description of some situations, but not all, where our use and disclosure of your medical information will require your written permission:

- **Psychotherapy Notes.** Most uses and disclosures of your psychotherapy notes will require your written permission. Generally speaking, psychotherapy notes are notes that are made by a mental health professional documenting or analyzing the contents of his or her conversations with you during conversations with you, during a counseling session, and that are kept separate for the rest of your medical record.
- **Marketing Purposes.** We may market our own services to you without your written permission. Subject to limited exceptions, uses, and disclosure of your medical information for other marketing purposes will require your written permission.
- **Sale of Medical Information.** Disclosures that would constitute the sale of your medical information will require your written permission.

If you give your permission to use or share your medical information, you may cancel that permission, in writing, at any time. If you cancel your permission, we will no longer use or share your medical information for the reasons covered by your written permission. We cannot take back any disclosures we have already made with your permission. We are required to keep records of the care that we provided you.

### **Your Rights Regarding Electronic Health Information Exchange**

The University of Kansas Health System Organized Health Care Arrangement entities participate in the electronic exchange of health information with other health care providers and health plans through an approved health information organization (HIO). Through our participation, your PHI may be accessed by other providers and health plans for the purposes of treatment, payment, or health care operations. The approved HIO is required to maintain safeguards to protect the privacy and security of PHI. The approved HIP may only allow authorized personnel to access PHI through HIO.

Under Kansas law, you have the right to decide whether providers and health plans can access your health information through HIO. You have two choices. First, you can permit authorized individuals to access your PHI maintained through an HIO for treatment, payment, or health care operations. If you choose this option, you do not have to do anything.

Second, you can restrict access to your PHI maintained through an HIO (except access by properly authorized individuals as needed to report specific information as required by law.) To do so, you must submit a request to opt out of HIE through Kansas Health Information Technology (KanHIT), which can be done by visiting <http://www.kanhit.org>. For more information on how to opt out, call the KanHIT Support Center at (785) 296-0461. You can restrict The University of Kansas Health System Organized Health Care Arrangement from making your PHI available to the HIO by following instructions at the section above, "Right to Request Restrictions". Even if you restrict access through (or opt out of the participating in) an HIO, providers and health plans may share your information through already available other legal means (facsimile or secure email) without your specific authorization.

If you receive health care services in a state other than Kansas, different rules may apply regarding restrictions on access to your electronic health information. Please communicate directly with your out-of-state health care provider about what action, if any, you need to take to restrict access.

Please understand your decision to restrict access to your electronic health information through an HIO may limit your health care providers' ability to provide the most effective care for you. By submitting a request for restrictions, you accept the risks associated with that decision.
